

EMULTROL RANGE OF HYBRID TACKIFYING RESIN DISPERSIONS: THE CASE OF EMULTROL E-55

Emultrol E-55 has several properties that make it an efficient, safe and versatile product:

Good **compatibility** with a wide range of synthetic polymers, acrylics, SBR, polychloroprene ...

Contains **no solvents or APEO**

Good resistance to **shear**

Good **thermal and UV stability**

Provides **better cohesion** to the final adhesive

Improves adhesion on polyethylene, polypropylene and plastic packaging substrates in general

Good **resistance to moisture**

Good performance at **high temperatures**

Very **good wetting** on non-porous surfaces
