

EVALUATION OF EMULTROL DFM DV-15 FG DEFOAMER IN AQUEOUS MEDIUM WITH POLYSORBATE 20

EMULTROL DFM DV-15 FG

- **Easy dissolution** in aqueous systems.
- **Does not affect the organoleptic properties** of food.
- **High persistence** of the antifoam effect.
- **High antifoam efficacy.**
- **Excellent effectiveness at low doses.**

*Complies with European regulations on food additives and has the certificate as an E-900 additive.

The **control and reduction of the foam level** improves the performance of the production processes. Therefore, the use of **antifoam agents** is recommended.

Polysorbate 20 surfactant is highly foaming in an aqueous medium. **EMULTROL DFM DV-15 FG** is recommended as an effective defoamer for aqueous media containing Polysorbate 20.
