## THE CONCENTROL RANGE OF ADDITIVES

### ANTIFOAMING AGENTS EMULTROL DFM® RANGE

- Antifoaming effect in manufacturing and application
- Deaerating properties
- Complete range based on all technologies to cover any application, condition of use and type of emulsion.

### WAX AND SILICONE EMULSIONS EMULTROL® RANGE

- **Wax emulsions:** modification of the surface finish (anti-blocking properties, smoothness, matting effect, gloss improvement, anti-slip, hydrophobicity).
- **Silicone emulsions:** slip properties, hydrophobization and improved resistance to abrasion.

# THE PAINT AND COATINGS SECTOR

## THE CONCENTROL RANGE OF ADDITIVES

### SILICONE SURFACE ADDITIVES

#### ORDISOL SWT® RANGE

- Better moisturizing without increasing the generation of foam with doses up to ten times lower than those of traditional moisturizers.
- They can provide special finishes, increase the smoothness of a coating, decrease friction, improve abrasion and scratch resistance, etc.
- They provide varnish extension, anti-crater and leveling properties.

### AUXILIARY PRODUCTS

- Aqueous dispersions of metallic soaps. Matting effect, sliding and non-stick.
- Tailor-made polymeric dispersions as part of the paint formulation.
