

TIN-FREE POLYURETHANE RELEASE AGENTS

LP ZMC-17 TBM AND LP FC-67-3 FTH

PROPERTIES

- They avoid the high adhesion of PU foams in the molds and allow the pieces to be removed without imperfections.
- We offer ready-to-use concentrates, diluted or diluted concentrates depending on the needs of the client
- Smooth, build-up-free finish
- **CONCENTROL LP ZMC-17 TBM** for one color shoe soles made of polyether and polyester with a satin matt finish
- **FC 67-3 FTH** for seats and backrests made with cold cured flexible polyurethane foam

ADVANTAGES

- Elimination of DBTL salts (Dibutyl-tin dilaurate)
- Elimination of other tin salts used as catalyst
- Solutions developed and adapted to customer needs
