

SILICONE DEFOAMERS BY CONCENTROL

THE EMULTROL DFM® RANGE

Concentrol offers a range of silicone-based defoamers in the form of **silicone emulsions**, **silicone compounds**, and solid defoamers in **powder form** for various industrial applications.

SILICONE EMULSIONS

- High dispersibility in aqueous systems
- Compatibility with a wide range of chemicals
- Effective at low doses

SILICONE COMPOUNDS

- 100 % based on active materials
- High stability against temperature and shear
- Can be used as a base for formulating silicone emulsion defoamers

SILICONES IN POWDER FORM

- Ease of handling and use
- Great stability at high temperatures and extreme conditions
